Industrial Training & Internship

Start small. Finish industry-ready.

Starter Program

1 month

₹2,999

Web development basics for complete beginners — no prior coding needed.

WEEK 1
HTML5
Page structure, semantic tags, links, images, tables and forms.

WEEK 2
CSS3
Box model, Flexbox, Grid, responsive design and media queries.

WEEK 3
JavaScript
Variables, functions, arrays, objects, DOM, events and fetch.

WEEK 4
React Basics
Components, props, state, hooks — plus the final project.

YOU BUILD Your own portfolio website, live on the internet.

Industrial Training / Internship

6 months

₹17,999

Project-first training for BCA, B.Tech, BSc, MCA and Diploma students and freshers.

MONTH 1
Web Foundations
HTML, CSS, JavaScript (ES6+), Git and GitHub.

MONTH 2
Frontend with React
Components, hooks, routing, API calls, Tailwind CSS.

MONTH 3
Backend Development
Node.js, Express, REST APIs, JWT authentication.

MONTH 4
Databases & Deployment
MongoDB, SQL basics, data modelling, hosting your app.

MONTH 5
Live Team Project
Agile sprints, code reviews, real Git workflow in a team.

MONTH 6
Launch & Career Prep
Deploy, document, present — resume and interview prep.

A deployed team project | **A GitHub portfolio** | **Interview-ready confidence**

02

Programming Languages & Mobile Apps

Short, focused courses. Learn one language properly. Fee on request.

Python incl. OOPs — 6 weeks

Wk 1–2	Syntax, data types, control flow, functions
Wk 3	Lists, dictionaries, comprehensions, files
Wk 4–5	OOP: classes, inheritance, polymorphism
Wk 6	Exceptions, modules, popular libraries

PROJECT A command-line app built with OOP.

JavaScript / TypeScript — 6 weeks

Wk 1–2	ES6+, functions, arrays, objects, DOM
Wk 3	Promises, async/await, fetch, modules
Wk 4–5	TypeScript: types, interfaces, generics
Wk 6	Tooling, debugging and best practices

PROJECT A typed task-manager web app.

Java — 8 weeks

Wk 1–2	Syntax, data types, loops, methods, arrays
Wk 3–4	OOP pillars, interfaces, packages
Wk 5–6	Collections, generics, exceptions
Wk 7–8	Streams, lambdas, file I/O, JDBC basics

PROJECT A console-based management system.

Golang — 8 weeks

Wk 1–2	Syntax, types, functions, slices, maps
Wk 3–4	Structs, interfaces, error handling
Wk 5–6	Goroutines, channels, concurrency
Wk 7–8	Modules, net/http, REST APIs, testing

PROJECT A fast REST API service in Go.

Mobile App Development

8 weeks

Fee on request

Wk 1–2	React Native setup, components, styling
Wk 3–4	Navigation, state, forms and lists
Wk 5–6	APIs, local storage, camera and location
Wk 7–8	Notifications, testing, building the APK

PROJECT Your own Android app, ready to install and share.

03

Full Stack Programs — Part 1

JavaScript-powered stacks. 4 months each, project in every month.

MERN Full Stack

MongoDB · Express · React · Node.js

4 months ₹6,499

MONTH 1
JavaScript Core
HTML, CSS, modern JavaScript, Git and GitHub.

MONTH 2
React Frontend
Hooks, React Router, state, forms, Tailwind CSS.

MONTH 3
Node & Express
REST APIs, middleware, JWT auth, validation.

MONTH 4
MongoDB & Launch
Mongoose, data modelling, deployment.

CAPSTONE A complete MERN web app — e.g. an e-commerce store — deployed live.

MERN Stack + TypeScript

The full MERN stack, written in TypeScript

4 months ₹8,999

MONTH 1
TypeScript Core
Types, interfaces, generics, strict mode.

MONTH 2
React + TS
Typed components, hooks, routing, API layer.

MONTH 3
Typed Backend
Express with TypeScript, Zod validation, auth.

MONTH 4
Data & Quality
MongoDB, unit testing, CI and deployment.

CAPSTONE A type-safe full-stack app with tests and CI.

TypeScript Full Stack

TypeScript · SQL · DevOps

4 months ₹9,999

MONTH 1
Advanced TS
Advanced types, patterns, Node runtime.

MONTH 2
Next.js Frontend
React, Next.js, server rendering, UI.

MONTH 3
SQL Backend
PostgreSQL, Prisma ORM, REST APIs, auth.

MONTH 4
DevOps
Docker, GitHub Actions CI/CD, cloud deploy.

CAPSTONE A containerised app with an automated CI/CD pipeline.

04

Full Stack Part 2 & Focused Tracks

Python and Java stacks for deeper, career-focused learning.

Python Full Stack

Python · React · TypeScript

4 months ₹12,999

MONTH 1
Python Core
Python, OOP, virtual environments, Git.

MONTH 2
FastAPI Backend
REST APIs, Pydantic, PostgreSQL, SQLAlchemy.

MONTH 3
React + TS
TypeScript, React, routing, API integration.

MONTH 4
Ship It
Auth, testing, Docker, deployment.

CAPSTONE A full-stack Python + React app, deployed.

Java Full Stack

End-to-end full stack development with Java

4 months ₹14,999

MONTH 1
Core Java
OOP, collections, streams, exceptions.

MONTH 2
Spring Boot
REST APIs, JPA / Hibernate, MySQL.

MONTH 3
React Frontend
Components, hooks, routing, API calls.

MONTH 4
Secure & Deploy
Spring Security, JWT, testing, deploy.

CAPSTONE An enterprise-style Java + React application.

Python + FastAPI

with Basic Machine Learning · 2 months ₹8,999

Wk 1–2	Python refresh and OOP
Wk 3–4	FastAPI, Pydantic, CRUD APIs
Wk 5	Database and authentication
Wk 6–7	NumPy, pandas, scikit-learn basics
Wk 8	Serve an ML model through an API

Java + Spring Boot

Fundamentals to advanced Java · 2 months ₹9,999

Wk 1–2	Core Java and OOP
Wk 3	Collections, streams, exceptions
Wk 4–5	Spring Boot and REST APIs
Wk 6	JPA, Hibernate and MySQL
Wk 7–8	Security, testing, final project

05 NEW LAUNCH

CodeForge AI

Don't just use AI. Build it.

26-Week Full-Stack + AI Engineer Program

Learn code. Master AI. Ship your own AI coding agent.

4 WEEKS

AI Only

Transformers, RAG and AI agents — explained and coded.

₹15,999

26 WEEKS FLAGSHIP

Full Stack + AI

Full-stack app, Docker, REST APIs, Auth, Kafka — capstone: your own AI coding agent.

₹25,999

26 WEEKS

Internship Track

The complete CodeForge AI program, run as an internship track.

₹35,999

Pick your stack

3 streams · 26 weeks each

Py PyStack AI

Python · FastAPI · React

Gentlest on-ramp, with computer vision using OpenCV.

Jv JavaStack AI

Java 21 · Spring Boot · Kafka

Enterprise discipline: microservices and secured APIs.

TS TypeStack AI

TypeScript · Next.js · Prisma

One language end to end — fastest to a deployable product.

26 weeks. One powerful portfolio.

every phase ends with something you built

PHASE	WEEKS	FOCUS	ENDS WITH
1	1–4	Language Foundations + AI Workflow	A working CLI tool
2	5–9	OOP / Typing, Testing	A tested mini-system
3	10–15	Backend, DB, REST APIs, Docker	A deployed backend
4	16–20	Frontend + Multimodal AI	A full-stack app
5	21–24	Transformers, RAG, Agents	A working AI feature
Capstone	**25–26**	**Build Your Own AI Coding Agent**	**A portfolio centrepiece**

06

Inside CodeForge AI

What you learn, phase by phase — every phase ends with something you built.

PHASE 1 · WEEKS 1–4

Language Foundations + AI Workflow

Your stream's language, Git, the terminal, and using AI assistants productively.

Ends with: A working CLI tool

PHASE 2 · WEEKS 5–9

OOP / Typing, Testing

Object-oriented design, type systems, unit testing, debugging, clean code.

Ends with: A tested mini-system

PHASE 3 · WEEKS 10–15

Backend, DB, REST APIs, Docker

API design, SQL databases, authentication, containers with Docker.

Ends with: A deployed backend

PHASE 4 · WEEKS 16–20

Frontend + Multimodal AI

Modern React / Next.js UI wired to your APIs, plus image and voice AI features.

Ends with: A full-stack app

PHASE 5 · WEEKS 21–24

Transformers, RAG, Agents

How LLMs work, embeddings, vector search, RAG pipelines, tool-using agents.

Ends with: A working AI feature

CAPSTONE · WEEKS 25–26

Build Your Own AI Coding Agent

Plan, build and demo an agent that reads, writes and runs code.

Ends with: A portfolio centrepiece

AI Only

4 weeks · for anyone who already codes

₹15,999

WEEK 1

How LLMs Work

Tokens, transformers, attention, model limits.

WEEK 2

Prompts & APIs

Prompt design, calling LLM APIs, embeddings.

WEEK 3

RAG Systems

Chunking, vector databases, retrieval pipelines.

WEEK 4

AI Agents

Tools, memory, planning — ship a working agent.

Internship Track

₹35,999

The complete 26-week CodeForge AI program, run as an internship: team project work and regular mentor reviews.

26 WEEKS · ANY STREAM

AI Add-on for Alumni
